

INDOOR AIR QUALITY STUDIES

FEELING SICK?

Research indicates that people are spending 90 percent of their time indoors. According to the EPA, **Indoor Air Quality** is one of the top environmental health risks of our time.

The symptoms of poor indoor air are often referred to as tight or sick building syndrome and include a variety of complaints that can be associated with inadequately controlled indoor air parameters:

- Insufficient or excessive humidity
- Too low or too high temperature
- Improper air exchange and air flow rates
- Excessive amount of carbon dioxide and/or carbon monoxide
- Contamination of indoor air

WHAT WE CAN DO FOR YOU

The Empirical Company's has over 18 years experience in identifying and correcting air quality issues. We will identify the problem and provide you with a solution. Our IAQ surveys are designed to identify contaminants resulting from design or equipment failure, catastrophe (fire, flood, etc.) new construction and renovation.

- Odor surveys and assessments
- Environmental related disease investigation
- Mold, bacteria and other microbiological assessments
- Investigative air quality assessment
- Detailed report of findings, conclusions and recommendations

WHO WE ARE

The Empirical Company is made up of a team of professionals with more than 80 years of combined experience in providing industrial hygiene services to government, industrial, institutional, commercial clients and private homeowners. Our team consists of a Certified Industrial Hygienist (CIH), Certified Occupational Health and Safety Technologist (OHST), Regional Environmental Assessor (REA), Certified Indoor Environmental Consultant (CIEC) as well as CADD, safety training and office support staff.
