#### ABOUT US

The Empirical Company is a small business incorporated in the State of Washington. The Empirical Company provides Lead-Based Paint and other Industrial Hygiene services nationwide.

#### CONTACT US

For more information or to schedule a consultation, call Edward S. DeLorme, OHST, at (888)735-1848

Homes, schools, and daycares aren't the only structures where lead paint may be of concern. Factories, petrochemical refineries, warehouses, office buildings, military bases, and other commercial/industrial structures, often are coated with lead-based paint, and it is still used in certain areas on bridges, rolling stock and other transportation infrastructure.

The Empirical Company's lead-based paint consultants are also certified as project designers and in project site surveillance. The staff can provide comprehensive services including design and development of remediation projects, assistance in prioritizing the lead-based paint to be abated, estimating the cost of abatement (including material replacement), developing project drawings, and bid documents for contractor selection, establishing a project schedule, and recommending practical alternative solutions.

We have work because our customers value high quality industrial hygiene and environmental consulting services.

- For quick accurate on-site results, we use a hand-held Niton XLp X-Ray fluorescence analyzer (XRF) Which provides a non-destructive analysis for in-place management.
- Remediation design
- Remediation monitoring
- Clearance sampling
- Waste stream analysis
- Waste disposal consulting
- On-site lead-based paint XRF surveys and risk assessments

#### For over 18 years **THE EMPIRICAL COMPANY**

Has been consulting clients  
On where lead is located,  
How it can be managed or  
Remediated using  
HUD and the EPA protocols.
